Subject: Microsoft Settlement

Dear Judge,

I am a student who is majoring in Business Administration at the University of Southern California. I am a firm believer in this country and the economic foundations that it was established on. Time has proven that capitalism and free market competition are the most effective means of prosperity. Do not allow Microsoft to tear down this system that has worked so effectively and efficiently for this country. Every court that has reviewed this case has declared that Microsoft has been aggressive in their illegal conduct, and I ask you to hold up the law and punish them for their actions, do not reward them by giving them exactly what they want.

Sincerely,

Daniel James Bain
